

Installation and execution manual

1. Install Python on your S60 Mobile

- a. http://downloads.sourceforge.net/pys60/PythonForS60_1_4_2_3rdEd.SIS
- b. http://downloads.sourceforge.net/pys60/PythonScriptShell_1_4_2_3rdEd.SIS

2. Accelerometer (Only N-95)

If this isn't your case go to point 3

You will need the following plugins:

- http://research.nokia.com/files/N95_RD_Accelerometer.zip
- http://prdownloads.sourceforge.net/pyed/aXYZ_3rd_N95_1_0_2_selfsigned.sisx

3. Instalation and execution of PyNoki Mobile

- a. Copy the script PyNokiMobile.py inside the folder c:\Python or e:\Python (Memory Card)
- b. Execute the script from the Mobile opening the Python Interpreter
 - i. Options>Run Script>e:PyNokiMobile.py

4. Execution of PyNoki (Server/PC side)

- a. Edit the file pass.dat with your Movistar Spain username and password
- b. Execute PyNoki.exe
- c. For help about commands, type "help"

* For communication between client and server must exist a direct connection to the Internet that doesn't pass through any proxy.
